DIXON COURTY DEMOCRACY,

At the late electon for delegates, and "for" or "against" State Government, party lines were drawn in Dixon County. The fight was a fair one, and it is now demonstrated that Dixon is Danmeratic by nearly three to one. L T. Hill was regularly nominated by the Republicans of the t County, and received 21 any emergency, to vote Bemocratic. Both James Tufts and Michael Jones were voted for in the county through some mistake. Neither nitions of war in abundance. of these gentlemen were candidates. ---

THE MERICAN PRIZE STREAMRS. ARRIVAL OF THE GEN. MIRAMON.

The U. S. prize steamer General Miramon, L'est Minor commading, came ad to the city yesterday morning and anchored off the Marine Hospital, where she now lies. She was Com. Marin's flig ship, and consequently fitted up with more of an eye to comfort and elegance than her consort, the Marquez de la Habana. Her cabin in particular, is very nearly and totefully arranged. Among its creaments are several very pretty drawings of the Commiform's two cops, who were taken su board with

The Miramon received three broadsides from the Sarstoga, besides an innumerable numher of rifle shots from the Indianola, during the engagement and it is surprising that the loss of life, in any ease great, was not even greater. Everything bears witness to the bravery and determined resistance of her commander. He yielded, however, vory gracefully to adverse fortune. Retireing at once to his cabin he divestes himself of every portion of his uniform, except a richly sesseled commodore's sparf, and attired himself in a plain but elegant suit of black, which he lise worn ever since.

Com. Marin is about fifty years of age but appears somewhat younger. He is very alight built, not more that five feet five or aix inches in height, and, perhaps, one hund ed and twenty pounds in weight. He is very firmly knit together however, particularly in the shoulders, stands and walks perfe thy erect, and, altogether, has command ing appearance. The Miramon is a handsome modeled steamer of about g00 tons burthen. She was built at Grennock, Scotland, as indicated by her engines, and is probably five or six years old. HOME MATTERS.

HIGH WIND .- We have often heard, at inervals during our existence, of the prodigious, and calamitous feats of sirecces, mensoons, typhoons, hurricanes and harrycanes, and other motions of the air for which we remember no particular appellation, but we had a blow of wind on Wednesday last that took all the originality and terror out of them, entirely. It commenced the evening previous and blew, as never wind blew before, for twenty consecutive hours; slamming doors and shutters in a most vehement manner; burling clouds of dust and sand into the eyes, up the nostrile, and down the throats of all who ventured in the streets; whistling around house corners, through every crevice and down the chimneys; banding lightning rods and amashing things of a b. Ittle nature into "smithereess;" unceremoniously jerking hats off the heads of males; unpolitely playing the dickens with the skirts of females; and other pranks too numerous or to tedious to mention. After the gust abated we observed one gentleman expectorate a sand-bar, and keard another emplsin of having an alluvial formation in his stomach about the size of a homestead .-Great is Wind !
